

# Where is the Stock? (WITS)

If you have a business spread across a number of different sites each with its own Infusion datafile, a WITS integration could prove invaluable to your operation.

WITS is designed to provide visibility into the stock holdings of individual products across multiple sites and datafiles.

- ⓘ Make the best use of your stock holding by moving stock between locations to fill orders.
- ⓘ Avoid unnecessary stock-outs.
- ⓘ Instant visibility across all sites to assist in group ordering.
- ⓘ Efficient management of stock can reduce stock on hand value and free up cash.

The screenshot displays the Infusion WITS software interface. The main window shows 'Item Code: 1001 - Queen Size Bed' with a 'Fields' button. Below this, a table shows stock data for two branches:

Company Name	In Stock	Allocated	On Order	Back Order	Available	Uninvoiced Jobs
Branch1	27.00	1.00	2.00	0.00	28.00	0.00
Branch2	42.00	1.00	3.00	0.00	44.00	0.00

A secondary window titled 'Location' is open, showing details for 'Branch : Branch1' and 'Product Code : 1001'. It contains a table with the following data:

Location	In Stock	Allocated	On Order	Back Order	Available	Uninvoiced Jobs
Auckland	3.00	1.00	2.00	0.00	4.00	0.00
Wellington	10.00	0.00	0.00	0.00	10.00	0.00
Christchurch	14.00	0.00	0.00	0.00	14.00	0.00
** Stock In Transit **	0.00	0.00	0.00	0.00	0.00	0.00

At the bottom of the Location window, a summary row shows: 'Total for All Locations' with values 27, 1, 2, 0, 28, and 0. There are 'Stock On Order' and 'Exit' buttons at the bottom of the interface.

## Pricing

Setup Fee

**\$495 + GST**
